The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/511,843	<b>Applicant(s)</b> WELSH, GRAHAM KENNEDY	
	<b>Examiner</b> Alvin C. Chin-Shue	<b>Art Unit</b> 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

Claims 5-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-12 have not been further treated on the merits.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear which of the rails “the rail”, as set forth in claim 2, is referring to.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Shull or Messera et al.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sperl in view of Shull. Sperl shows the claimed ladder with the exception of the hole and plunger. Shull shows a pin 56 having a hole for receiving a plunger 59 connected to an opposite rail. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the pin 45 of Sperl to comprise a hole and to comprise a plunger, in lieu of his stop 46, to enable positive locking of his pin adjacent to the opposite rail 26.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pace in view of Shull. Pace shows the claimed ladder with the exception of the hole and plunger. Shull shows a pin 56 having a hole for receiving a plunger 59 connected to an opposite rail. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the pin at 72 of Pace to comprise a hole and to comprise a plunger, in lieu of his spring catch, to enable positive locking of rail at 20 in a collapsed position.
